

VIDEHA

Thethi-Angika Style Manual

ठेठी-अंगिका लेखन-शैली निर्देशिका

Batch 1 · House Style for Writing, Translation, Editing & Linguistic QA

Purpose: to give ChatGPT and Videha editors a stable, source-aware working standard for Thethi-Angika. It is deliberately practical: how to choose orthography, pronouns, honorificity, auxiliaries, negation, word order, local vocabulary, dialogue register, translation procedure and final QA without turning Thethi-Angika into Hindi or into Standard Maithili.

Primary editorial base: Gajendra Thakur's parallel grammar + Angika literary and grammar sources

12 September 2026

Gajendra Thakur, Editor · Videha — First Maithili Fortnightly eJournal

1. Governing principle

ठेठी-अंगिका लेल ई शैली-पत्रक मूल सिद्धान्त अछि/है कि भाषा अपन व्याकरणिक चालि, ध्वनि-आदत, सर्वनाम-व्यवस्था, क्रिया-सामञ्जस्य आ लोक-शब्दावली पर चलत। हिन्दी अथवा मानक मैथिलीक वाक्य बनाय कऽ केवल शब्द बदलनाय स्वीकार्य पद्धति नहि हए। अर्थ, प्रसंग, आदर-स्तर आ क्षेत्रीय रूप पहिने बुझल जाए; तकर बाद वाक्य ठेठी-अंगिका ढंग सँ फेर सँ बनावल जाए।

SUPREME RULE: future explicit corrections from the editor override this manual. The user's own approved Thethi-Angika forms outrank web frequency, historical spelling, and automatic analogy from Maithili.

2. Source authority hierarchy

1. Editor-approved Thethi-Angika correction or project rule — highest authority.
2. This Thethi-Angika Style Manual — default house standard.
3. Gajendra Thakur, मैथिलीक एकटा समानान्तर व्याकरण, रचना आ भाषा विज्ञान ठेठी-अंगिका आ बज्जिकाकेँ संग लऽ कऽ — primary structural guide; its Thethi-Angika section explicitly includes orthography, pronouns/honorificity, TAM, agreement, syntax, editing, translation and a लेखनक शैली-पत्र.
4. Attested Angika literary usage, especially prose/poetry and the historical literary corpus — evidence for living register and lexical choice.
5. Angika grammar and lexicographic resources — evidence for paradigms, variants and phonological spellings.
6. Hindi, English and Standard Maithili — source languages for comparison only; never templates to copy mechanically.

3. Scope and classification: editorial neutrality

‘ठेठी-अंगिका’ एहि निर्देशिकामे एकटा editorial working label हए. ई शैली-पत्र भाषिक पहचानक विवादक फैसला नहि करै हए. पुरान सर्वेक्षण-परम्परामे Chhika-Chhiki केँ Southern Maithili सँग जोड़ल गेल, जखनकि आधुनिक Glottolog Angika केँ ISO 639-3 anp सहित अलग languoid रूपमे सूचीबद्ध करै हए. Videha writing therefore records the competing traditions transparently and does not force one classification backward onto every historical text.

House policy: linguistic classification and writing style are separate questions. A text may be edited in Thethi-Angika house style without claiming that all historical Thethi/Chhika-Chhiki/Angika material has one uncontested taxonomic status.

4. Register labels

Label	Meaning
HOUSE-DEFAULT	Preferred neutral modern Thethi-Angika for new Videha prose.
PHONOGRAPHIC	Fine-grained spelling with special vowel/phonetic marks; use only where sound detail matters.
LITERARY	Attested literary form; valid, but not automatically the neutral prose default.
REGIONAL	Area-specific Thethi/Angika form; preserve when speaker/setting requires it.

COLLOQUIAL	Dialogue/oral register.
FORMAL	Academic, critical, administrative or explanatory prose.
ARCHAIC/HISTORICAL	Retain for historical quotation or lexical documentation.
REVIEW	Reading or function not secure enough to normalize.

5. Script and orthography

5.1 Devanagari house script. Reader-facing Videha Thethi-Angika should normally use Unicode Devanagari. Historical Anga/Kaithi discussion may be documented, but new general prose must remain digitally stable and searchable.

5.2 Reader-facing simplicity. Do not overload ordinary prose with specialist phonetic signs. Angika grammatical sources distinguish forms such as अ, अऽ, अँ and use marks like ' for fine phonetic values; for normal publication, use the simplest spelling that does not erase a meaningful contrast.

5.3 PHONOGRAPHIC mode. When the task is grammar, dictionary work, field data, minimal-pair discussion or exact quotation, retain documented marks such as final/rounded अऽ, अँ, नँ and related symbols exactly as the source/project requires.

5.4 Never normalize quotations silently. Literary or historical spellings are evidence. Preserve them in quotations; if a normalized form is needed, give it separately.

5.5 Avoid Hindi orthographic reflex. Do not restore श/ष/ण, Hindi-style schwa, or other spellings merely because the Hindi cognate has them. Source-based Angika pronunciation/spelling governs the choice.

5.6 Stable punctuation. Use modern Unicode punctuation and quotation marks that survive DOCX/PDF/web conversion. Legacy-font artefacts are never house style.

6. The two orthographic layers

Layer	Use	Example policy
House/simple Devanagari	Novels, essays, translation, journalism, children's writing	Prefer readable forms; do not insert phonetic marks unless contrast is needed.
Phonographic/linguistic	Grammar, dictionary, field notes, pronunciation analysis	Retain forms such as हम्मँ, तोहँ, नँ, ओकरऽ where analytically relevant.
Source-fidelity	Quotation, old literature, title, historical citation	Keep the source spelling; label rather than silently 'correct'.

7. Core lexical and function-word identity

A Thethi-Angika text must be recognisable in its small grammatical words, not only in a few colourful nouns. The following are high-value identity markers. Regional variants may remain, but Hindi forms should not become the automatic default.

Hindi-shaped default	Thethi-Angika house direction	Status
और	आरो	HOUSE-DEFAULT connector in formal/neutral Thethi-Angika.
यह	ई	HOUSE-DEFAULT near demonstrative.
वह	ऊ / हौ / हुनी by person, distance and respect	Context-sensitive; do not flatten all to ऊ.

नहीं	नै	HOUSE-DEFAULT conversational/neutral negation; formal source-specific नहि may be retained.
क्या	की	Question particle/word where appropriate.
कौन	के / कोन	Choose human/selection function by syntax.
कैसे	केना	Manner question.
कैसा	कैन्हऽ	Quality/state question in marked Thethi-Angika spelling.
कोई	कोय	Indefinite person.
कुछ	कुच्छू / कुछ	Use register/source; कुच्छू is strongly Angika-marked.
अपना	अपनऽ / अपना / आपनै	Choose reflexive/possessive paradigm, not Hindi agreement.
मेरा/हमारा	हमरऽ / हमरी	Gender/relational form by syntax.
तुम्हारा	तोरऽ / तोहरऽ / तोरहऽ	Choose documented person/register form.
उसका	ओकरऽ / होकरऽ / हुनकऽ	Distance/respect determines form.

8. Genitive and relational marking

8.1 Neutral instructional prose. The user's parallel grammar frequently uses analytic के in headings and explanations (for example, क्रिया के आधार, वाक्य के बुनियादी ढाँचा). This is acceptable as a neutral explanatory pattern.

8.2 Pronominal possession. Prefer native possessive paradigms such as हमरऽ/हमरी, तोरऽ/तोहरऽ, ओकरऽ/हुनकऽ rather than mechanically attaching Hindi का/की/के.

8.3 Literary केरऽ / केरी / केरौ. Forms of केर- are legitimate and visible in Angika literary identity (including titles such as '...केरौ इतिहास'). Use them where the register/source supports them; do not sprinkle them mechanically into every sentence.

8.4 No cross-language forcing. Do not import Maithili -क as a universal replacement into Thethi-Angika merely because it is correct Maithili.

9. Personal pronouns and respect

Pronoun choice is one of the strongest signals of Thethi-Angika grammar. Angika sources show multiple levels and variants; the manual therefore prescribes functions first, spellings second.

Person/function	Documented forms	House guidance
1st person	हम्मै, हम्मै; oblique हमरा; possessive हमरऽ/हमरी	Use the project's simple or phonographic layer consistently.
2nd person familiar	तोहँ, तौ, तौय; oblique तोरा/तोहरा	Do not substitute Hindi तुम/तुम्हें.
2nd person respectful	आपनँ and related respectful forms in documented paradigms	Keep respect level stable across pronoun + verb.

3rd person non-honorific/distant	ऊ, हो; oblique ओकरा/होकरा; possessive ओकरऽ/होकरऽ	Distance/deixis matters.
3rd person respectful	हुनी; oblique हुनका; possessive हुनकऽ/हुनकी	Use with corresponding honorific verbal behavior.
Near demonstrative	ई; oblique एकरा/हेकरा; possessive एकरऽ/हेकरऽ	Avoid Hindi यह/इसका as default.
Indefinite	कोय, कुच्छू, केकरो, किनको	Choose case/meaning, not a single generic ‘किसी’.
Relative	जे, जोन, जेकरा, जेकरऽ, जिनका, जिनकऽ	Pair naturally with a correlative in the clause.
Interrogative	के, कोन, केकरा, किनका, केकरऽ	Choose person/case/possessive function.
Reflexive	आपनै, अपना, अपन्है, अपनऽ	Maintain coreference; do not copy source-language reflexive syntax.

10. Plurality and group marking

10.1 Do not import Hindi plural agreement automatically. Angika grammatical descriptions note that a change from singular to plural does not necessarily force a different verb form. First determine the construction, person and honorificity.

10.2 Group markers. सिनी / सनी / आरनी / सब are attested grouping/plural strategies. Treat them as register/regional options, not decorative suffixes.

10.3 House consistency. Within one narrator voice, choose one main grouping strategy unless character speech or regional setting motivates a switch.

10.4 Human vs non-human plurality. Do not assume one plural marker fits every noun class; use attested idiom and the domain corpus.

11. Gender: do not Hindi-ise agreement

11.1 Pronouns. Documented Angika pronouns do not require the Hindi-style masculine/feminine split in all three persons.

11.2 Finite verbs. Gender marking is more restricted than in Hindi. Do not make every predicate agree like Hindi merely because the referent is female.

11.3 Marked/honorific past forms. Gender/number/honorific distinctions can appear in selected past or participial constructions; preserve the attested paradigm rather than generalizing one rule to all verbs.

उदाहरण / Example: Documented contrast: सीता गेली; राम गेला. General present-type clauses may show the same base: मरद जाय छै; जनानी जाय छै.

12. Auxiliary system: preserve Angika morphology

Never flatten Thethi-Angika auxiliaries into Hindi है/हैं/था or Standard Maithili अछि/छथि. The auxiliary inventory itself is a core Angika signal.

Attested auxiliary family	Editorial use
छै / छी	Common present/copular/auxiliary functions; person/register must be checked.
छेकै / छिकै / छिका	Marked Angika auxiliary family; preserve where the selected variety uses it.
छिएे	Person-specific form in attested paradigms.
छेलिएे / छलिएे / छलियै / छेलै / छलै / छलैं	Past/copular-auxiliary family; select by person/register/context.
रहै / रहैं	Progressive/continuous and related auxiliary use; do not substitute Hindi रहना-pattern mechanically.

12.1 One narrator, one paradigm. Do not randomly mix छेकै, छै, छिकै, छिएे, standard Maithili अछि and Hindi है in the same neutral narration.

12.2 Character speech may vary. A character may use a regional auxiliary different from the narrator. Mark this as voice, not error.

12.3 Meaning before form. Determine tense, aspect, mood, person and honorificity before choosing the auxiliary.

13. Verb architecture and aspect

13.1 SOV core. The unmarked clause is broadly Subject–Object–Verb. Focus and discourse may move constituents, but Hindi/English word order should not be copied by habit.

13.2 Progressive. Use the Thethi-Angika participial/progressive structure documented for the selected register, for example forms of जाय/लिखी + रहलऽ/रहली + auxiliary.

13.3 Perfective subject marking. The particle नै is documented in perfective/transitive examples such as राम नै ... लिखलकै. In PHONOGRAPHIC mode retain it exactly; in simplified house prose use the project-approved normalized spelling, but never delete its grammatical function blindly.

13.4 Causative/compound verbs. Do not translate Hindi or English light-verb combinations word-for-word. Rebuild with an attested Angika predicate.

13.5 Gender/person suffixes. Forms such as लिखलकै, गेली, गेला, रहली, रहला etc. are not interchangeable ornaments. They encode grammatical/social information.

14. Negation

14.1 Default negative. Use नै as the normal Thethi-Angika negative in conversational and much neutral prose; use नहि only where the selected formal/literary source or project explicitly adopts it.

14.2 Avoid Hindi नहीं. Outside quotation or deliberate code-switching, नहीं is a red flag.

14.3 Scope. Place the negative according to what is negated. Do not mechanically insert नै immediately before the final auxiliary if that changes the intended scope.

14.4 Double negatives. Do not ‘correct’ a naturally licensed local negative pattern by Hindi logic; verify the intended reading.

15. Questions

Meaning	Preferred Thethi-Angika resources	Editorial note
---------	-----------------------------------	----------------

who	के	Human interrogative.
which	कोन	Selection.
whose	केकरऽ / किनकऽ	Possessive.
whom	केकरा / किनका	Oblique/honorific.
what	की	Question word/particle by context.
how	केना	Manner.
what kind / how is	कैन्हऽ	Quality/state.
where	कन्न / regional locative forms	Do not force one form across all Thethi-Angika regions.

15.1 No English inversion. Do not change Thethi-Angika word order merely because the source sentence is an English question.

15.2 Politeness. A polite question is built through pronoun, verb/honorific morphology and pragmatic softening—not by importing Hindi कृपया constructions everywhere.

16. Demonstratives, deixis and relative-correlative syntax

16.1 Near vs far. Use ई-type forms for near reference and ऊ/हौ-type forms for distal reference, with respectful हुनी where appropriate.

16.2 Oblique forms. Use one of the attested case paradigms (एकरा/हेकरा/हिनका; ओकरा/होकरा/हुनका) rather than Hindi इसको/उसको.

16.3 Relative-correlative. Prefer native जे-ऊ / जे-से-type relational structures according to the selected variety and register.

16.4 Discourse reference. Once a participant is established, avoid over-repeating full nouns; choose the correct pronoun level without losing respect.

17. Adjectives and comparison

17.1 Local adjective shapes. Angika grammar records short and expanded forms such as हरऽ/गोरऽ and हरका/गोरका. Use the form that matches register and construction.

17.2 Avoid ornamental अतिगुरु forms. Highly expanded forms may be expressive/colloquial. Do not overuse them in neutral academic prose.

17.3 Comparative. Use documented comparative strategies with सें/सं/से and बेसी/बेशी instead of manufacturing a Hindi -तर or English-style morphological comparative.

17.4 Superlative. Use constructions with सभ में / सभ सें / equivalent local pattern; verify regional spelling.

18. Companion words, reduplication and expressive vocabulary

Thethi-Angika has a strong expressive layer. Pairings and echo-like combinations are not decorative noise; they can encode semantic grouping, rhythm and local culture.

Attested type	Examples	Rule
---------------	----------	------

Companion pair	कोल-कोलासी, गप-सरक्का, आलती-पालथी	Preserve where meaning is understood; do not replace with a flat Hindi generic.
Social/family pair	धिया-पुता, गोतिया-लइया	Use in appropriate social register.
Action/emotive pair	कानै-धुनै, कानै-कुनै	Useful in narrative/dialogue; do not over-formalize.
Everyday compound	कागज-पत्तर	Natural colloquial grouping; academic prose may choose a more explicit term when precision is required.

19. Local vocabulary versus Sanskrit/Hindi vocabulary

- Prefer an established Thethi-Angika word when it expresses the intended meaning precisely.
- Do not reject every tatsama word: formal, philosophical, legal and academic prose may need shared Sanskritic vocabulary.
- Do not choose a Sanskrit word merely because it looks ‘purer’. Thethi-Angika naturalness outranks display vocabulary.
- Do not replace culturally specific food, agriculture, kinship, ritual, riverine, craft or folk-performance terms with generic Hindi if a local term is available.
- For dictionaries and WordNet-type work, label regional, folk, archaic and technical terms rather than flattening them into one neutral list.

20. Thethi-Angika versus Standard Maithili: no mechanical transfer

The Videha Pure Maithili Style Manual and this Thethi-Angika Style Manual are separate governing systems. A form preferred in pure Maithili is not automatically preferred in Thethi-Angika.

Risk	Thethi-Angika rule
Copying Maithili copulas	Do not replace Angika छै/छैकै/छिकै etc. with अछि/छथि by reflex.
Copying Maithili genitive	Do not force -क where Thethi-Angika uses के, केरऽ, pronoun possessives or other local patterns.
Copying Maithili negation	Do not force नहि if the Thethi-Angika register naturally uses नै.
Copying Maithili conjunction	Use आरो as the house Thethi-Angika connector rather than automatically importing Maithili आ.
Copying Maithili honorifics	Use Angika pronoun + auxiliary/verbal paradigms; do not transplant Maithili person endings.
Copying vocabulary corrections	A Maithili replacement list applies only after it is independently confirmed for Thethi-Angika.

21. Translation protocol into Thethi-Angika

1. Read the complete source sentence/paragraph for meaning; do not begin by replacing individual words.
2. Identify who is speaking, to whom, and with what level of respect.
3. Choose the narrator/register: HOUSE-DEFAULT, colloquial, literary, formal, regional or phonographic.

4. Rebuild the clause in Thethi-Angika SOV logic; remove English/Hindi inversion and source-language filler.
5. Choose pronouns and demonstratives from Thethi-Angika paradigms.
6. Choose tense–aspect–mood and then the correct auxiliary/person form.
7. Check negation and question structure.
8. Replace generic Hindi words with precise local vocabulary where evidence exists.
9. Read aloud for Angika rhythm; if it sounds like Hindi with a few changed endings, rewrite.
10. Run the final contamination scan and source-fidelity check.

22. Hindi-to-Thethi-Angika rewrite patterns

Source-shaped / avoid	House-style direction	Reason
और वह वहाँ नहीं गया।	आरो ऊ ओतय/वैंजां नै गेल...	Connector + demonstrative + negation; finish verb by person/register.
यह मेरा भाई है।	ई हमरऽ भाय ...	Native demonstrative + possessive; choose auxiliary from context.
तुम कैसे हो?	तोंय कैन्हऽ ... ?	Pronoun + interrogative quality form; choose second-person auxiliary.
वह क्या कर रहा है?	ऊ की करी रहलऽ ... ?	No Hindi रहा है skeleton; use local progressive.
कोई यहाँ है।	ऐंजां कोय रहे छै।	Documented indefinite/locative pattern.
किसका घर है?	केकरऽ घर ... ?	Native possessive interrogative.
उसने पेंसिल से लिखा।	राम नं पेंसिल सें लिखलकै (pattern).	Marked perfective subject + instrumental + finite verb.
लड़की स्कूल जा रही है।	बेटी इसकूल जाय रहली छै (attested pattern).	Local progressive and gender-marked form in this construction.

23. Dialogue

- Dialogue may preserve region, caste/community setting, age, intimacy and individual pronunciation; narrator prose should remain internally consistent.
- Respect must be audible in pronoun and verb choice, not only in honorific nouns.
- Do not give all characters the same standardised voice.
- Do not ‘clean’ folk forms into Hindi merely because they look non-standard.
- Code-switching with Hindi/English is allowed only when it is a deliberate character or social fact, not accidental authorial drift.

24. Literary prose and narrative

- Prefer concrete verbs and local spatial/time expressions over abstract Hindi bureaucratic noun chains.
- Use local kinship, agrarian, riverine, food, festival and folk-performance vocabulary when the setting requires it.
- Let clause rhythm follow speech without making the printed text unreadable.
- Use literary forms such as केरौ/केरऽ, expressive pairs and region-specific auxiliaries only with register control.

- A narrator may be slightly more standardised than dialogue, but should still remain recognisably Thethi-Angika.

25. Academic and critical prose

- State the argument clearly in Thethi-Angika syntax; technical Sanskrit/English terms may follow in parentheses where useful.
- Keep one technical equivalent stable across a chapter.
- Use plain Devanagari unless the linguistic point itself requires phonographic marks.
- Do not allow Hindi academic filler to take over the prose; shorten phrases into direct Thethi-Angika clauses.
- When discussing competing language classifications, report the source and date instead of presenting one contested view as timeless fact.

26. Poetry and folk genres

- Do not distort a genuine Thethi-Angika form merely to make rhyme.
- Preserve folk metrics, song refrains and local morphology when editing orally derived material.
- If a poem is historical or region-specific, source orthography may be more important than house-normalised spelling.
- Avoid explanatory prose inside a poem unless the genre itself calls for it.
- Meter, rhyme and Sanskritic ornament must never erase natural Thethi-Angika syntax.

27. Dictionary / lexicography mode

1. Separate headword, pronunciation/phonographic form, house/simple spelling, part of speech, sense, register and example.
2. Do not collapse हम्मे / हम्म, तोह / तौय, केर / केरी etc. without explaining whether they are orthographic, case, gender, honorific or regional variants.
3. Give sense-specific examples; do not translate a Hindi gloss word-for-word.
4. Mark REGION, COLLOQUIAL, LITERARY, ARCHAIC and PHONOGRAPHIC where appropriate.
5. Preserve minimal pairs and similar-sounding words; Angika lexicographic sources show that small vowel/consonant distinctions can separate meanings.
6. A doubtful scan/OCR reading must go to REVIEW, not into the normative list.
7. Scientific names, proper names and quoted titles must retain their appropriate form.

28. Similar-sounding words: editorial caution

Angika lexical sources explicitly list near-homophonous forms with distinct meanings. Therefore automated spelling ‘correction’ is dangerous.

Example contrast	Editorial lesson
कप्पा / खोपा	Do not autocorrect unfamiliar local forms toward a common Hindi word.
कोरनी / खोरनी	One consonant can change the domain and meaning.
किल्ला / किला	Do not assume one is a typo of the other.

हर / हऱ	Diacritics or vowel quality may distinguish meanings; preserve in PHONOGRAPHIC/lexical work.
रंग / रकम	A local semantic network may differ from Hindi; definitions must be context-based.

29. Final self-use protocol for ChatGPT

Before I deliver substantial Thethi-Angika text, I should run this sequence:

1. Identify whether the target is Thethi-Angika—not Maithili, Hindi or generic ‘Bihari’.
2. Select register and orthographic layer.
3. Scan for Hindi function words: और, यह, वह, नहीं, किसी, कोई, कैसे, कौन, मेरा, तुम्हारा, उसका.
4. Scan for accidental Standard Maithili function morphology: अछि/छथि, universal -क genitive, automatic Maithili pronouns, and Maithili-only correction rules.
5. Check आरो and native connector choices.
6. Check pronoun, case/oblique form and respect level.
7. Check demonstrative distance: ई / ऊ / respectful alternatives.
8. Check TAM and auxiliary: छै/छैकै/छिकै/छिए/ past forms; no arbitrary mixing.
9. Check plural marker and avoid Hindi-style plural agreement.
10. Check negation (normally नै) and interrogatives.
11. Check local possessive/relational morphology.
12. Read aloud for sentence rhythm and Hindi/English skeleton.
13. Remove AI/process notes, placeholders and source-language residue before publication.

30. Red-flag scanner

और · यह · वह · नहीं · किसी · कोई (when Angika कोय is intended) · कैसे · कौन · मेरा · तुम्हारा · उसका · है · हैं · था · थी ·
Standard-Maithili अछि/छथि used by reflex · universal -क genitive · word-for-word English inversion

A red flag is a request for review, not an automatic replacement. Quotation, code-switching, technical terminology and proper names may legitimately contain these forms.

31. Quick house-default matrix

Feature	House default	Variants / caution
Script	Unicode Devanagari	Phonographic marks only when needed.
Connector ‘and’	आरो	Regional/literary alternatives only with evidence.
Near demonstrative	ई	Oblique एकरा/हेकरा etc.
Far demonstrative	ऊ	Respectful/variant हौ/हुनी etc.
Negation	नै	नहि formal/source-specific; नहीं only quotation/code-switch.
1st person	हम्मैं (simple layer)	हम्मैं in phonographic layer; oblique हमरा.
2nd familiar	तौय / project-selected form	तोहँ, तौँ; keep one narrator paradigm.

3rd respectful	हुनी	Oblique हुनका; possessive हुनकऽ/हुनकी.
Indefinite person	कोय	Case forms must be selected separately.
Reflexive/own	अपनऽ / अपना	Use paradigm by function.
Possessive relation	pronoun possessives; के / केरऽ where idiomatic	Do not import Hindi का or Maithili -क blindly.
Present auxiliary	छै-family	Select person/honorific form.
Progressive	local participial + रहल-/रहै auxiliary system	Do not copy Hindi रहा है.
Word order	SOV	Focus may rearrange constituents.
Comparative	सें/से + बेसी etc.	Regional phonographic variants possible.

32. Five-pass editing standard

Pass	Question
1 — Meaning	Has any proposition, scene, relation or nuance been omitted or added?
2 — Language identity	Does the text sound like Thethi-Angika rather than Hindi or Standard Maithili?
3 — Morphology	Are pronoun, case, honorificity, TAM, auxiliary, plural and negation correct?
4 — Lexicon/register	Are local words precise and consistently labelled for register?
5 — Publication	Is Unicode clean, punctuation stable, and are process notes/placeholders removed?

Appendix A. Mini reference paradigms

Function	Selected documented forms
1st nominative	हम्मैं / हम्मैं
1st oblique	हमरा
1st possessive	हमरऽ / हमरी
2nd familiar	तोहैं / तों / तोंय
2nd oblique	तोरा / तोरहा / तोहरा
2nd possessive	तोरऽ / तोरहऽ / तोहरऽ
3rd	ऊ / हौ / हुनी
3rd oblique	ओकरा / होकरा / हुनका
3rd possessive	ओकरऽ / होकरऽ / हुनकऽ / हुनकी
near demonstrative	ई; oblique एकरा/हेकरा/हिनका
indefinite	कोय, कुच्छू
relative	जे, जोन, जेकरा, जेकरऽ, जिनका, जिनकऽ
interrogative	के, कोन, केकरा, किनका, केकरऽ
reflexive	आपनै, अपना, अपन्हैं, अपनऽ

Appendix B. Attested grammatical examples — use as patterns, not templates

Example	What to learn
ऐंजां कोय रहै छै।	Indefinite + locative/existential pattern.
कुइयाँ में कुच्छू गिरलऽ छै।	Indefinite non-person + perfect/result pattern.
वैजां के सूती रहलऽ छै ?	Interrogative + progressive pattern.
तोंय केकरा हाँ गेलऽ छेलहो ?	2nd person + oblique interrogative + past auxiliary pattern.
जे पढ़थैं नै छै, ऊ पास केना होतै ?	Relative + negation + correlative/question pattern.
राम न पेंसिल से लिखलकै।	Marked perfective subject + instrumental + finite verb.
बेटी इसकूल जाय रहली छै।	Progressive with gender-marked participial form in this documented construction.

Appendix C. Source-use policy

Source	Use	Do not do
Gajendra Thakur parallel grammar	Primary structure, editing workflow, Thethi-Angika scope	Do not treat common Maithili terms elsewhere in the 1111-page book as automatically Thethi-Angika.
Angika Sahitya Kero Itihaas	Literary history, older orthography, cited verse/prose, author usage	Do not treat its Hindi editorial prose as the Thethi-Angika house standard.
Angika.com Grammar	Paradigms, pronouns, auxiliaries, phonographic distinctions, lexical contrasts	Do not accept every web spelling as the sole universal standard; regional variation is real.
Glottolog / ISO	Current language identifier/classification metadata	Do not use metadata to erase historical classification traditions.
Future editor corrections	Final authority	Never overrule with corpus frequency.

Appendix D. Bibliographic basis for Batch 1

- Gajendra Thakur. मैथिलीक एकटा समानान्तर व्याकरण, रचना आ भाषा विज्ञान ठेठी-अंगिका आ बज्जिकाकेँ संग लऽ कऽ. Videha eJournal. 1111 pp. The Thethi-Angika section includes grammar, composition, editing, translation, quick paradigms, practical vocabulary and a dedicated लेखनक शैली-पत्र.
- डॉ. डोमन साहु ‘समीर’, डॉ. तेजनारायण कुशवाहा, डॉ. अमरेन्द्र. अंगिका साहित्य केरौ इतिहास. हिन्दी अकादमी, हैदराबाद, 1998. Used here as literary-historical evidence and for attested Angika excerpts.
- कुंदन अमिताभ / Angika.com. व्यावहारिक अंगिका व्याकरण (web edition): orthography, pronouns, adjectives, verbs, gender, lexical contrasts and companion words.
- Glottolog 5.3. Angika (Glottocode angi1238; ISO 639-3 anp).
- G. A. Grierson, Linguistic Survey of India (1903), as indexed in modern bibliographic resources for Chhika-Chhiki/Southern Maithili historical classification.

Appendix E. Batch 2 expansion plan

Batch 2 should be corpus-driven. It should add: (1) a 500–1000-item high-confidence Thethi-Angika house lexicon; (2) full verb and auxiliary paradigms by person/honorificity; (3) region-labelled pronoun and locative tables; (4) a Hindi→Thethi-Angika contamination dictionary; (5) a Maithili→Thethi-Angika false-friend / structural-difference table; (6) narrative/dialogue examples from Thethi-Angika literature; and (7) a machine-checkable QA checklist for future translations.

— END OF BATCH 1 CORE MANUAL —

VIDEHA

Thethi-Angika Style Manual — Batch 2 Expansion

ठेठी-अंगिका लेखन-शैली निर्देशिका • द्वितीय विस्तार

Corpus-driven implementation of Appendix E · cumulative with Batch 1

Governing continuity. Batch 1 remains intact and continues to govern. Batch 2 operationalises its seven-point expansion plan. Future explicit editor corrections remain the supreme authority and override both batches.

12 September 2026

Gajendra Thakur, Editor · Videha — First Maithili Fortnightly eJournal · ISSN 2229-547X

Batch 2 deliverable	Implementation status	Editorial safeguard
1. 500–1000-item house lexicon	IMPLEMENTED: 520 entries	HOUSE-CORE separated from CORPUS-ATTESTED and PATTERN entries.
2. Verb & auxiliary paradigms	IMPLEMENTED	Exact unattested person cells are not invented; source-selection flags are explicit.
3. Region-labelled pronoun/locative tables	IMPLEMENTED with provenance labels	No district is assigned unless the consulted source actually maps the form geographically.
4. Hindi → Thethi-Angika contamination dictionary	IMPLEMENTED	Replacement is context-sensitive, not blind search/replace.
5. Maithili → Thethi-Angika false-friend/structure table	IMPLEMENTED	Maithili is comparison language, never automatic template.
6. Narrative/dialogue literary examples	IMPLEMENTED	Literary forms are tagged; quotations remain source-fidelity evidence.
7. Machine-checkable QA checklist	IMPLEMENTED	Regex flags trigger review; semantic/honorific checks remain human/editorial.

33. Batch 2 corpus, confidence and provenance policy

33.1 Evidence before normalisation. A form enters the Batch 2 operational resources only when it is supported by Batch 1/editorial rules, the parallel grammar, the Angika grammar/lexicographic corpus, or a clearly identified literary attestation. Mere similarity to Hindi or Standard Maithili is not evidence.

33.2 Confidence labels. A-HOUSE = safe neutral house default or core grammar form; B-CORPUS = high-confidence attested form whose register/region must still be respected; P-PATTERN = safe editorial construction/pattern built from attested morphology; L-LITERARY = literary/source form, not automatically neutral prose.

33.3 Source codes. M1 = Batch 1 manual; PG = Gajendra Thakur parallel grammar; AG-V/AG-P/AG-N/AG-A/AG-W/AG-C/AG-X = Angika.com grammar sections (verb, pronoun, noun, adjective, number,

companion words, lexical contrasts); AD = AngDesh dictionary corpus; AK = Angika.com story/prose corpus.

33.4 Corpus spelling versus house spelling. Corpus spellings are evidence, not automatic prescriptions. Where Batch 1 has already selected a house form (for example आरो as the neutral connector), a corpus variant such as आरु/आरू is retained as a labelled variant rather than silently replacing the house form.

33.5 No invented district mapping. The present sources attest many variants but do not consistently assign each pronoun, locative or auxiliary to a specific district. Batch 2 therefore labels provenance/register precisely and leaves district = UNSPECIFIED when the evidence does not support a finer map.

34. High-confidence Thethi-Angika house lexicon and phrasebank — 520 items

This operational lexicon mixes lemmas, grammatical forms and fixed/useful phrase patterns because all three are needed for translation QA. A-HOUSE forms are preferred defaults. B-CORPUS and L-LITERARY entries are valid evidence but must not be sprayed into neutral prose without register control. P-PATTERN entries are reusable constructions, not claims that every lexical noun has only one possible form.

Lexicon entries · odd IDs	Lexicon entries · even IDs
L001 · आरो — and; also; neutral connector. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]	L002 · ई — this; near demonstrative. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]
L003 · एकरा — this one; oblique. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L004 · हेकरा — near demonstrative: oblique variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]
L005 · हिनका — near/honorific oblique variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L006 · एकरऽ — this one's; near possessive. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]
L007 · हेकरऽ — near possessive variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L008 · ऊ — that/he/she: distal non-honorific. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]
L009 · हौ — distal/third-person variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L010 · हुनी — respectful third person. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]
L011 · ओकरा — distal oblique non-honorific. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L012 · होकरा — distal oblique variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]
L013 · हुनका — respectful oblique. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L014 · ओकरऽ — distal possessive. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]
L015 · होकरऽ — distal possessive variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L016 · हुनकऽ — respectful possessive. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]
L017 · हुनकी — respectful possessive marked form. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L018 · हम्मे — first person; simple house layer. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]
L019 · हम्मे — first person; phonographic layer. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L020 · हमरा — first-person oblique. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]
L021 · हमरऽ — my/our; possessive. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]	L022 · हमरी — first-person possessive marked form. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]
L023 · तोहँ — second familiar; phonographic. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L024 · तौ — second familiar variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]

Lexicon entries · odd IDs	Lexicon entries · even IDs
L025 · तौँय — second familiar; simple/project form. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]	L026 · तोरा — second-person oblique. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]
L027 · तोरहा — second-person oblique variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]	L028 · तोहरा — second-person oblique variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]
L029 · तोरऽ — your; familiar possessive. [A-HOUSE; M1/AG-P/AG-V/AG-A/AG-W]	L030 · तोरहऽ — your; possessive variant. [B-CORPUS; M1/AG-P/AG-V/AG-A/AG-W]

L519 · सुगर — pig. [B-CORPUS; AD]	L520 · सुनबो — listen/hear. [B-CORPUS; AD]

Lexicon release rule: corpus-attested does not equal house-default. If a later editor correction conflicts with any entry, the editor correction wins immediately.

35. Verb and auxiliary paradigms by person, honorificity and TAM

The source corpus provides the auxiliary inventory and several person-marked examples, but not one single exhaustive table assigning every auxiliary form to every person across every regional variety. The Videha table therefore distinguishes ATTESTED cells from FAMILY/SELECT cells. “SELECT” means choose the member documented for the project variety; it is deliberately not an invented conjugation.

Person / respect	Pronoun set	Present/copular family	Past/copular family	Direct attestation / rule
1st person	हम्मैं / हम्मैं; oblique हमरा	छिए / छी / selected छै-family	छेलिए; also छलिए/छलियै family	हम्मैं इसकूल गेलऽ छेलिए।; छिए listed as person-specific.
2nd familiar	तोहँ / तों / तोंय	selected छै-family; do not substitute Hindi हो/है	छेलहो is directly attested; other past forms must be variety-selected	तोंय केकरा हाँ गेलऽ छेलहो ?
2nd respectful	आपनँ and project-selected respectful forms	select respectful auxiliary from chosen corpus; no invented default	select documented respectful past member	Respect must stay aligned across pronoun + verb; exact cell is source-dependent.
3rd non-honorific	ऊ / हौ; ओकरा/होकरा	छै / छेकै / छिकै according to selected variety	छेलै / छलै-family where attested	रामू हमरो पड़ोसिया छेकै; many dictionary examples use छै.
3rd respectful	हुनी; हुनका; हुनकऽ/हुनकी	select honorific member of the छै/छेकै family from project corpus	छलैं-family where source/person context supports it	Do not transplant Standard Maithili छथि; verify the selected Angika honorific paradigm.
Plural/group	noun/pronoun + सिनी/सनी/आरनी/सब etc.	often no automatic finite-verb change	person/honorificity remains decisive	Grammar example: बेटी → बेटी सिनी while जाय रहली छै remains unchanged.

35.1 Auxiliary inventory and editorial function

Family/form	Function in Batch 2	House instruction
छै / छी	present/copular/auxiliary	Common core; choose by person/register.
छेकै / छिकै / छिका	marked Angika auxiliary family	Preserve where selected variety uses it; do not random-mix with छै.

Family/form	Function in Batch 2	House instruction
छिऐ	person-specific auxiliary	Use only where person/context supports it.
छेलिऐ / छलिऐ / छलियै / छलै / छलै / छलै	past/copular family	Map through attested person/register evidence; never assign by analogy alone.
छेल्हो	past 2nd-familiar attested form	Safe in the attested pattern; do not universalise beyond it.
रहै / रहैं	progressive/continuative auxiliary	Build local progressive; avoid Hindi रहा है skeleton.
रहलऽ / रहली	progressive participial morphology	Agreement/person/gender effects are construction-specific.

35.2 Operational verb architecture

TAM/construction	Attested or house pattern	Editorial use
Simple/non-progressive base	खा-, जा-, चल-, कर-, लिख- etc.	Select local finite ending; do not paste Hindi endings.
Progressive	जाय/लिखी/करी + रहलऽ/रहली + auxiliary	Gender/person morphology may occur in the participial element.
Perfective transitive	subject + नै + instrument/object + finite form	Example: राम नै पेंसिल सें लिखलकै। Keep नै in phonographic mode.
Past with auxiliary	गेलऽ + छेलिऐ / छेल्हो etc.	Person-marked auxiliary is part of the construction.
Future-like	होतै; लेबै; जैबै and source-selected forms	Do not infer one ending for all persons.
Negative	नै placed for intended scope + local verb/auxiliary	Do not mechanically put नै only before final auxiliary.
Plural subject	noun + group marker; verb may remain same	Do not import Hindi plural agreement.

35.3 Ten-verb editorial paradigm grid

Lexical verb	Nonfinite/base resources	Progressive frame	Perfective/past evidence	Future/other
जा “go”	जा / जाय	जाय रहलऽ/रहली + aux	गेलऽ; गेली; गेला; गेलऽ छेलिऐ/छेल्हो	जैबै; person-selected future
कर “do”	कर / करी	करी रहलऽ + aux	source-selected finite past	करतै/करबै corpus patterns; verify person
लिख “write”	लिख / लिखी	लिखी रहलऽ + aux	लिखलकै (attested)	source-selected future
खा “eat”	खा / खाय	खाय रहलऽ + aux	source-selected past	लेबै in खाय लेबै compound pattern
रह “stay/be”	रह	रहै/रहैं; रहलऽ/रहली	past auxiliary family as context requires	source-selected
हो “become/be”	हो / होय	होय रहलो छै in corpus	होलै / भेलै literary-corpus forms	होतै; हुवे in subordinate/conditional contexts
देख/परेख “see/examine”	देख / परेख	परेखी रहलो ...	source-selected past	source-selected
सुन “hear/listen”	सुन / सुनबो	सुनी/सुनि + progressive as attested	source-selected	source-selected

Lexical verb	Nonfinite/base resources	Progressive frame	Perfective/past evidence	Future/other
रोप “plant”	रोप / रोपना	रोपी/रोपै + progressive as corpus supports	source-selected	रोपै; खेती frame
सीख “learn”	सीख / सीखबै	सीखी + progressive after corpus check	source-selected	सीखबै attested corpus form

36. Pronoun and locative tables with provenance/region labels

Region labels here are evidence labels, not invented district assignments. TH-HOUSE = Videha neutral Thethi-Angika house layer; ANG-BROAD = broad Angika grammatical attestation; PHON = phonographic grammar layer; LIT = literary/corpus form; DISTRICT-UNSPEC = consulted source does not safely assign the form to one district.

Function	TH-HOUSE / simple	ANG-BROAD / variants	PHON / literary	Geographic note
1st person	हम्मै; हमरा; हमरऽ/हमरी	हमरा सिनी/आर etc. in plural constructions	हम्मँ	DISTRICT-UNSPEC
2nd familiar	तोंय; तोरा; तोरऽ	तों; तोरहा/तोहरा; तोहरऽ/तोहऽ	तोहँ	DISTRICT-UNSPEC
2nd respectful	project-selected respectful form	आपनँ documented in grammar	आपनँ	DISTRICT-UNSPEC; do not equate automatically with Hindi आप or Maithili अहाँ
3rd distal non-honorific	ऊ; ओकरा; ओकरऽ	हौ; होकरा; होकरऽ	source spelling as quoted	DISTRICT-UNSPEC
3rd respectful	हुनी; हुनका; हुनकऽ/हुनकी	same family; plural/group can add marker	literary spellings such as हुन्कऽ may occur	DISTRICT-UNSPEC
Near demonstrative	ई; एकरा; एकरऽ	हेकरा/हेकरऽ; हिनका	source-specific	DISTRICT-UNSPEC
Relative	जे; जेकरा; जेकरऽ	जोन; जिनका; जिनकऽ	source-specific	DISTRICT-UNSPEC
Interrogative	के; कोन; केकरा; केकरऽ	किनका; किनकऽ	source-specific	DISTRICT-UNSPEC
Indefinite	कोय; कुछू; केकरो	किनको; कुछ as broader variant	source-specific	DISTRICT-UNSPEC

36.1 Locative/deictic matrix

Meaning	Preferred/attested form	Label	Caution
here	ऐंजां	TH-HOUSE / AG corpus	Use consistently within narrator voice.
there	वैजां	TH-HOUSE / AG corpus	Strong attested locative.
there	ओतय	HOUSE-compatible regional/corpus option	Do not force if narrator paradigm uses वैजां.
where	कन्नं	PHON / regional	Use exact mark in phonographic work; simpler project spelling only if editor approves.
now/at this time	अखनिए	AD corpus	Lexical locative/time deictic; not a universal replacement for every “now”.

Meaning	Preferred/attested form	Label	Caution
then/at that time	ओखनी	AD corpus	Corpus spelling; retain register/source.
when/what time	कखनी	AD corpus	Interrogative temporal deictic.

37. Hindi → Thethi-Angika contamination dictionary

These are contamination flags, not blind replacement commands. Quotation, code-switching, proper names and technical terminology may legitimately contain a flagged form. The editor must first determine meaning, person, respect, deixis and TAM.

Hindi-shaped trigger	Thethi-Angika direction	Check before replacing
और	आरो	Connector function; literary/corpus variants may occur.
यह	ई	Check near deixis and oblique case.
इसका	एकरऽ/हेकरऽ	Choose case/deixis; do not literal-copy.
इसको	एकरा/हेकरा	Choose case/person.
वह	ऊ / हौ / हुनी	Distance + honorificity.
उसका	ओकरऽ / होकरऽ / हुनकऽ	Distance + respect.
उसको	ओकरा / होकरा / हुनका	Oblique + respect.
नहीं	नै	Formal/source-specific नहि is possible.
कोई	कोय	Person vs non-person meaning.
कुछ	कुच्छू / कुछ	Register; कुच्छू strongly Angika-marked.
किसी	केकरो / किनको / other case form	Do not use one generic substitute.
कौन	के / कोन	Human “who” vs selection “which”.
किसको	केकरा / किनका	Respect/case.
किसका	केकरऽ / किनकऽ	Possession/respect.
क्या	की / कथी by selected corpus	Question function.
कैसे	केना	Manner.
कैसा	कैन्हऽ	Quality/state.
मेरा/हमारा	हमरऽ / हमरी	Possessive syntax, not Hindi gender agreement.
तुम्हारा	तोरऽ / तोहरऽ / तोरहऽ	Select narrator/region paradigm.
अपना	अपनऽ / अपना / आपनै	Coreference/function.
यहाँ	ऐंजां	Locative narrator paradigm.
वहाँ	वैंजां / ओतय	Choose one main narrator strategy.
कब	कखनी / project-selected form	Temporal interrogative.
कहाँ	कन्नं / project-selected regional form	Orthographic layer.
है/हैं	छै-family	Person/honorificity; no one-to-one replacement.

Hindi-shaped trigger	Thethi-Angika direction	Check before replacing
था/थी/थे	छेल-/छल- auxiliary family	Select person/register, not Hindi gender template.
रहा है / रही है / रहे हैं	local participial + रहल-/रहै + auxiliary	Rebuild the progressive.
ने	नँ in documented perfective/transitive pattern	Only where grammar licences it; phonographic vs simple spelling.
से	सें/सं/से	Instrument/comparison/ablative function.
का/की/के	pronoun possessives; के/केरS etc.	Do not mechanically replace all occurrences with one marker.
बहुत	बहुते / खूबे / bड्डी etc. by corpus/register	Meaning and intensity; avoid decorative dialectising.
बच्चा	बुतरु / बच्चा / नुनु etc. by age/register	Local lexical choice depends on context.
सुबह	बिहान / भोर	Time nuance.
सिर	माथो / project-selected local form	Body-part register.
बिल्ली	बिलाय	Local lexicon where neutral for project.
सुअर	सुगर	Local corpus form.
मुंह	थोथरी in marked/local register	Do not force marked colloquial form into formal prose.
धूप	रौदा	Local lexical option.
नमक	रामरस in marked/local lexical register	Use only if intended register supports it.
जबरदस्ती	बलजबरी	Corpus lexical option.
आलसी	असकतिया	Corpus lexical option.
जिद्दी	थेथर	Marked/local lexical option.
सुबह-सुबह	भोर/बिहान + local time phrase	Rebuild idiomatically.
गाँव	गाम / corpus गाँव spellings	Narrator orthography; keep consistent.
लड़का	छौरा	Colloquial/local; formal context may choose a different noun.
लड़की	छौरी / बेटी by relation/context	Do not collapse “girl” and “daughter”.
भाई	भाय	Corpus/house-compatible local form.
बहन	बहिन	Corpus local form.
माता-पिता	माँय-बाप / माय-बाबू etc. by register	Kinship register.
पड़ोसी	पड़ोसिया	Corpus local noun.
कुएँ में	कुइयाँ में	House/corpus spelling if selected.
मिट्टी	मट्टी	Corpus local form.
मशीन	मसिन	Corpus local form; technical prose may retain standard technical term.
महँगा	महगो	Corpus local adjective.
शुरुआत	सुरुआत	Corpus spelling.
होशियार	होसयार	Corpus local spelling.

Hindi-shaped trigger	Thethi-Angika direction	Check before replacing
साँस	सहाँस	Corpus local form.
समुद्र	समुन्दर / सागर	Corpus/shared; choose register.
सूखा	सुक्खा / सुखलो	Corpus morphology.
सुनना	सुनबो / local finite form	Verb morphology required.
खरीदना	किनना	Corpus local verb.
कुदाल	कोदार	Local agricultural lexicon.
कैची	कचीया	Local corpus noun.
कमरा	कोठरि	Local corpus noun.
छत	छप्पर where thatched/roof sense fits	Semantic precision: छप्पर is not every roof.
वेतन	दरमाहा for monthly wage	Register/semantic specificity.
नदी	नद्दी / project simple spelling	Orthographic layer.
सुंदर	सुन्दर/सुन्दरी etc. by syntax	Do not copy Hindi gender agreement blindly.
अच्छा काम	बढ़ियाँ/बरिया काम by corpus	Register; avoid mechanical substitution.
मुनाफ़ा	फैदा	Meaning may also be broader “benefit”.
असफल	फैल / local predicate	Register; formal prose may use a technical equivalent.
मृत शरीर	लाहास	Corpus local noun; register-sensitive.
किसान/खेती करना	local खेती/जोतना/रोपनी constructions	Prefer concrete local agricultural verbs.
वह क्या कर रहा है?	ऊ की करी रहलऽ ... ?	Rebuild question + progressive + auxiliary.
यह मेरा भाई है।	ई हमरऽ भाय ...	Pronoun + possessive + context-selected auxiliary.
कोई यहाँ है।	ऐंजां कोय रहै छै।	Existential pattern.

38. Standard Maithili → Thethi-Angika false-friend and structural-difference table

This table does not label Maithili forms “wrong.” It prevents accidental transfer from the separate Videha Pure Maithili system into Thethi-Angika. A Maithili form may still appear in quotation, contact speech or a separately justified regional source.

Maithili reflex/risk	Thethi-Angika rule	Why it matters
आ as automatic “and”	Use आरो as neutral house connector	Small function words strongly signal language identity.
अछि / छथि	Use Angika छै/छेकै/छिकै/छिए etc.	Auxiliary system is a core structural marker.
छल/छलाह etc. copied by reflex	Use attested छेल-/छल- Angika family by person/register	Similar-looking past systems are not interchangeable.
नहि everywhere	Neutral/conversational default is नै	नहि may remain in formal/source-specific contexts.
universal -क genitive	Use pronoun possessives, के, केरऽ/केरी etc. as idiomatic	Do not import one Maithili genitive strategy.

Maithili reflex/risk	Thethi-Angika rule	Why it matters
हम / हमहुँ etc. by default	Use हम्मे/हम्म; oblique हमरा	Pronoun identity.
अहाँ as automatic respectful 2nd	Use project-selected Angika respectful paradigm; आपन is documented	Respect must be expressed in the Angika system.
तौ/तोरा copied without source check	Use selected Angika familiar set तोहँ/तौ/तौय + obliques	Some forms overlap; paradigm choice must be explicit.
ओ as universal 3rd	Use ऊ/हौ/हुनी according to distance/respect	Deixis and honorificity.
एहि/ओहि copied mechanically	Use ई/एकरा... and ऊ/ओकरा... selected Angika forms	Case/deixis system differs.
कै as automatic object/dative	Use Angika oblique/case construction supported by corpus	Do not transplant postpositions blindly.
सँ everywhere	Use सें/स/से by project layer	Orthography and function differ.
सभ as only plural strategy	Angika also uses सब, सब्भे, सिनी, सनी, आरनी, लोग etc.	Plural/group marking is richer and voice-sensitive.
plural verb agreement by Maithili analogy	Do not force verb change merely for plural subject	Grammar source explicitly notes unchanged verb in examples.
Maithili human/nonhuman auxiliary rule copied wholesale	Use Angika person/honorific/auxiliary system	Do not import a separate house manual's agreement rules.
जाइत अछि-style progressive	Use local participial + रहल-/रहै + Angika auxiliary	Progressive architecture differs.
गोलाह-style honorific past copied	Use Angika source-selected past/honorific morphology	Honorific ending must be Angika evidence-based.
करैत/दैत-type forms copied mechanically	Use Angika attested verb morphology	Avoid analogical transfer from Maithili participles.
एतय/ओतय as automatic locative pair	Batch 2 house has ऐंजां/वैंजां; ओतय may be an option	Choose one narrator paradigm.
कोना as automatic “how”	Use केना in the house system	High-value interrogative marker.
केहन as automatic “what kind”	Use कैन्हऽ in the selected marked house spelling	Interrogative adjective differs.
केओ as automatic indefinite	Use कोय	Indefinite pronoun identity.
किछु as automatic “something”	Use कुच्छू/कुछ by selected register	Do not transfer a Maithili core form by reflex.
अपन/अपनहि copied without paradigm check	Use आपनै/अपना/अपन्है/अपनऽ by function	Reflexive morphology is explicitly documented.
वएह/ओही distinctions from Maithili manual	Do not import unless independently attested for Thethi-Angika	Editor-approved Maithili corrections are language-specific.
Maithili lexical replacement lists	Apply only after independent Angika confirmation	Separate governing systems.
माथ/काज etc. from Maithili house list	Do not auto-substitute in Thethi-Angika	A “pure Maithili” preference is not Angika evidence.
देब/दैत/देत Maithili rules	Do not transfer automatically	Verb paradigms must be Angika-source based.
छथि for human persons	Never use as automatic Angika honorific auxiliary	Batch 1 explicitly warns against this transfer.
.मे/.पर punctuation/spacing assumptions	Follow chosen Thethi-Angika orthography/source	Micro-orthography may differ.

Maithili reflex/risk	Thethi-Angika rule	Why it matters
Sanskritic purification because Maithili permits it	Prefer natural Thethi-Angika local wording when precise	Naturalness outranks display vocabulary.
Maithili word order retained after word substitution	Rebuild clause in Thethi-Angika SOV/discourse logic	Translation must be structural, not lexical.
Maithili dialogue voice for all characters	Use Angika regional/social voice	Narrator and characters may differ.
Maithili-style honorific suffix on a copied verb	Select Angika pronoun + verb/auxiliary pair	Respect is a whole-paradigm property.
Maithili “आ” + Angika rest	Scan connector first	Mixed function morphology is a common contamination signature.
Maithili अछि with Angika lexical nouns	Replace only after recalculating person/TAM	One copied auxiliary can de-Angikise the whole sentence.
Maithili नहि with Angika colloquial dialogue	Prefer नै unless character/source motivates नहि	Register consistency.
Maithili -क on every noun relation	Use analytic/local relation strategies	Avoid over-Maithilisation.
Maithili-style direct translation from English	Run Thethi-Angika translation protocol from meaning first	The same anti-calque rule applies across source languages.

39. Narrative and dialogue examples from Angika literature/corpus

Literary evidence is used here to learn rhythm, genitive strategy, dialogue cadence and auxiliary variation. It does not automatically override the neutral house default. Short source snippets are kept brief; the editorial lesson is paraphrased.

Source / type	Short attested snippet	Editorial lesson
“बेटी जलखै करी के जो” — narrative	“बात कुछ समय पहले केरऽ छिके”	Literary केरऽ + छिके cadence is valid source evidence; do not flatten quotation to house prose.
“भैंस आरो घोड़ा” — fable/dialogue	“भैंस आरो घोड़ा दोनों एके वन में रहे छेले”	आरो is strong connector evidence; छेले is a literary/corpus past auxiliary variant.
“पत्थर केरऽ जीवन कथा” — narrative	“एक छोटऽ सन कहानी हमरऽ बड़ी प्रिय छै”	Shows छोटऽ सन, हमरऽ and final छै in literary narration.
“महादेव जी” — narrative	“जबे पाप केरऽ अंधकार संसार के ढकी दै छै”	Shows जबे + केरऽ + compound predicate cadence.
Angika grammar essay prose	“सरल व सहज भाषा सें बनलऽ वाक्य”	Formal prose can remain Angika in syntax while using shared technical vocabulary.

39.1 Corpus-guided editorial constructions (not quotations)

- Neutral narration: ऐंजां कोय रहै छै, मुदा वैजां कोय नै देखाय रहलऽ छै।
- Familiar dialogue: तौय केन्हऽ छऽ/selected 2nd-person auxiliary? — exact auxiliary must match the project paradigm; do not invent it from Hindi.
- Respectful reference: use हुनकऽ/हुनकी with the project-selected honorific verb family; do not import Standard Maithili honorific agreement by reflex.
- Agrarian narration: बिहान खेतो मे पानी पटना, रोपनी, दौनी, गाछ लगाना सन concrete local verbs/nouns should outrank bureaucratic Hindi noun chains when the scene calls for them.
- Lexical register: बुरह, छौरा, छौरी, रामरस, रौदा, थोथरी are not decorative dialect tokens; use only where meaning, speaker and register support them.

40. Machine-checkable QA checklist for future translations

Automation is a first-pass warning system. A regex hit means REVIEW, not automatic replacement. Devanagari word boundaries are not always handled reliably by every regex engine, so the recommended rules use Devanagari-aware lookarounds where possible.

ID	Severity	Machine test / trigger	Required action
HIN-001	ERROR	(?<![\u0900-\u097F])(और यह वह नहीं किसी कैसे कौन मेरा तुम्हारा उसका)(?![\u0900-\u097F])	Review for Hindi contamination; preserve only if quotation/code- switch/proper context.
HIN-002	ERROR	(?<![\u0900-\u097F])(है हैं था थी थे)(?![\u0900-\u097F])	Recalculate person/TAM and select Angika auxiliary.
HIN-003	ERROR	(रहा रही रहे)\s+(है हैं था थी थे)	Rebuild progressive with local participial + रहल-/रहै system.
MTH-001	ERROR	(?<![\u0900-\u097F])(अछि छथि)(? [\u0900-\u097F])	Possible Standard Maithili auxiliary contamination.
MTH-002	WARN	(?<![\u0900-\u097F])आ(?![\u0900- \u097F])	If used as connector “and,” review against house आरो; may be legitimate lexical material.
NEG-001	WARN	नहीं	Usually change by meaning to नै; quotation/code-switch exception.
CONJ-001	INFO	आरो	Expected house connector; absence is not automatically an error.
PRO-001	WARN	(?<![\u0900-\u097F])(तुम तुम्हें आप अहाँ)(?![\u0900-\u097F])	Check intended 2nd-person Angika paradigm and respect.
DEM-001	WARN	(?<![\u0900-\u097F])(इसका उसका इसको उसको)(?![\u0900- \u097F])	Select near/far + case + respect form.
Q-001	WARN	(?<![\u0900-\u097F])(क्या कैसे कैसा कौन)(?![\u0900-\u097F])	Check की/केना/कैन्हऽ/के~कोन function.
GEN-001	WARN	का की के	Do not blind-replace: inspect relational syntax; shared lexical strings may contain these.
AUX-001	WARN	(छै छेकै छिकै छिका छिए){0,80} (अछि छथि है हैं)	Possible mixed auxiliary systems inside one local window.
AUX-002	WARN	(अछि छथि है हैं){0,80}(छै छेकै छिकै छिका छिए)	Same mixed-system check in reverse order.
ORTH-001	INFO	अआइईउऊएऐओऔ ँ क.ह.ं	Phonographic marks present: confirm PHONOGRAPHIC mode is intended.
ORTH-002	WARN	[“”]	Curly quotes are allowed, but verify consistent Unicode punctuation after conversion.
LAT-001	WARN	[A-Za-z]{3,}	Review unexplained English residue; technical terms/proper names may remain.
PLACE-001	ERROR	\b(TODO TBD PLACEHOLDER INSERT HERE XXX)\b	Publication blocker: remove placeholder/process residue.
AI-001	ERROR	(as an AI AI-generated ChatGPT language model)	Publication blocker unless the document explicitly discusses AI.

ID	Severity	Machine test / trigger	Required action
SPACE-001	WARN	{2,}	Collapse accidental repeated ASCII spaces unless layout requires them.
PUNC-001	WARN	[?]{2,} [!]{2,}	Review accidental repeated punctuation.
DUP-001	WARN	(?<![\u0900-\u097F])([\u0900-\u097F]+\s+\1(?![\u0900-\u097F]))	Review accidental repeated word; legitimate reduplication must be exempted.
HON-001	HUMAN	No safe regex	Verify pronoun + oblique + possessive + auxiliary all carry one respect level.
TAM-001	HUMAN	No safe regex	Verify tense-aspect-mood before choosing auxiliary/ending.
REG-001	HUMAN	No safe regex	Verify HOUSE / LITERARY / REGIONAL / COLLOQUIAL labels and narrator consistency.
SEM-001	HUMAN	No safe regex	Confirm no proposition, relation, scope or nuance was added/omitted.
SRC-001	HUMAN	No safe regex	Quoted/literary spelling must not be silently normalised.

41. Batch 2 release checklist

- L exicon count = 520; every item has status and source code.
- ☐ No B-CORPUS or L-LITERARY item is silently promoted to A-HOUSE.
- ☐ Pronoun/locative table uses provenance labels; unsupported district mapping is left UNSPECIFIED.
- ☐ Verb tables distinguish direct attestation from family/source selection.
- ☐ Hindi contamination table is context-sensitive, not search-and-replace.
- ☐ Maithili table treats the two Videha manuals as separate systems.
- ☐ Literary quotations remain short and source-fidelity spellings are retained.
- ☐ QA regexes are warnings/blockers only; honorificity, TAM, semantics and register still require editorial review.
- ☐ Unicode Devanagari is publication default; phonographic marks appear only where analytically justified.
- ☐ Future editor corrections override this Batch 2 release immediately.

Appendix F. Batch 2 source-code key

Code	Source/use
M1	Videha Thethi-Angika Style Manual — Batch 1 (governing manual).
PG	Gajendra Thakur, मैथिलीक एकटा समानान्तर व्याकरण, रचना आ भाषा विज्ञान ठेठी-अंगिका आ बज्जिकाकेँ संग लऽ कऽ — structural/editorial guide.
AG-V	Angika.com practical grammar: क्रिया (Verb) — verb architecture and auxiliary inventory.
