VOL_III.docx — Dūṣaṇa Pañjī (dūṣaṇa pañjī) —
Ṭebulakā entries 1–97

A genealogical register of lineage pollutions /
prohibited alliances (dūṣaṇa = blemish/pollution).
Records kulas with inter-caste marriages, devadāsī
connections, nimna-kula (degraded lineage), niṣiddha-
kula (prohibited lineage), kocarāja-patnī (wives of cow-
herder kings), antaḥjātīya (inter-caste) unions.

Each numbered entry (1–97) records: (1) village list
across columns; (2) personal names in those villages
across 2–5 rows; (3) footer line = progenitor reference
(sutā/sutra + ref number like 178/1) + special_status
note

1–97 (ṭebulakā 1–97 as stated in header). Some
numbers missing = merged with prior entry (e.g. 5
absent, entry 4 has two sub-blocks)

Tab-separated: each tab = one village column. Variable
number of columns per entry (6–12). Village names in
row 1, personal names in rows 2+, aligned positionally.

Cross-reference number (e.g. 178/1, 208/2) linking to
the Upa-Tīpa Pañjī. Format: [register_no]/[entry_no]

nimna-kula = degraded/lower gotra; niṣiddha-kula =
prohibited lineage (marriages forbidden); antaḥjātīya =
inter-caste union; devadāsī = temple
dancer/courtesan; kocarāja-patnī = wife of
cowherd/low-caste king

ajñāta = unknown/unidentified person in that village
column
