IAST ARCHIVE — D_7_Notes

Term / Field	Explanation
BATCH 1	
Source	VOL_II.docx — Prachin Pañjī (prācīna pañjī)
Structure	Running genealogical prose organised by village/lineage labels. No numbered sections. Each paragraph = one or more ancestor chains in continuous IPA prose.
Para range	Para 1–384
Entry_ID range	02-00001 to 02-02576
Marriage records	2576 in this batch
SCHEMA	
1_Marriage_Records	Entry_ID · Para_No · Location_Label · Ancestor · Ancestor_Prefix · Bride_Village · Bride_Father · Bride · Verb · Marriage_Type · Incomplete_Flag
2_Lineage_Records	One row per (para, ancestor) chain: Para_No · Location · Ancestor · Marriage_Count · Para_Text_IAST (full IAST-converted paragraph text)
3_Name_Index	All ancestors sorted by marriage count; title annotations
4_Village_Index	Bride-villages ranked by frequency
5_Honorifics_Titles	Titled persons: m.m.u., maho., jyo., vāiyākaraṇa, ācārya, adhyāpaka, rājā, etc.
6_Sections_Summary	Per-paragraph: location label, total/complete/incomplete marriage counts
7_Notes	Schema key and batch metadata
NOTE ON COMPLETENESS	Marriage_Type primary = with Bride_Father suta Bride pattern; secondary = Bride only (village sṃ Bride dāu). Incomplete_Flag Y = village or bride is ellipsis/missing in original IPA. Ancestor extraction is best-effort from running prose — field contains the name appearing in the suta construction nearest to each record.
ACTION VERB	dāu = dattā (bride given); du dāu = secondary dāu (second wife/alliance)
